Job position

Laboratory Manager

About the role

We are a new tertiary hospital preparing for opening and are seeking an experienced Laboratory Manager to lead the commissioning and operations of our hospital laboratory services. This is a key leadership role responsible for setting up laboratory systems, ensuring regulatory compliance, and delivering high-quality diagnostic services to support clinical care.

The successful candidate will be part of the pioneer team and play a critical role in establishing safe, efficient, and scalable laboratory services from pre-opening through full operations.

Duties and responsibilities

- Lead commissioning and setup of laboratory services and equipment
- Manage daily laboratory operations and staff
- Ensure compliance with MOH, PHFSA and CKAP requirements
- Implement quality management system and laboratory SOPs
- Manage budget, inventory and vendor performance
- Work closely with clinicians to support patient care

Academic qualifications

- Degree in Medical Laboratory Technology / Biomedical Science or equivalent

Skills and experience required

- Minimum 8 years hospital laboratory experience, with management experience
- Strong knowledge of hospital lab regulations and quality systems
- Experience in hospital opening or lab setup is an advantage
- Good leadership and communication skills
